EDUCATION

Graphic Era Hill University, Dehradun <i>Master of Computer Applications (MCA)</i>	Aug 2024 – May 2026 CGPA: 8.71/10
Shri Guru Ram Rai University, Dehradun <i>B.Sc (PCM)</i>	Aug 2019 – Aug 2022 CGPA: 8.59/10
The Doon Valley Public School, Deoband <i>Intermediate (CBSE)</i>	2019 88.2%
The Doon Valley Public School, Deoband <i>Matriculation (CBSE)</i>	2017 9.6/10

INTERNSHIP

General Mobile Technology India Pvt. Ltd. (MCarbon) <i>Technical Operations Intern</i>	March 2026 – June 2026 Noida, Uttar Pradesh
--	---

- Monitored infrastructure and application performance using **Zabbix**, ensuring high system availability.
- Managed incident lifecycle and service requests using **HPE Service Manager (HPSM)**.
- Performed real-time monitoring, first-level troubleshooting, and issue escalation within defined **SLA** timelines.
- Configured **Zabbix** monitoring alerts and gained hands-on experience with **Linux** and **MySQL**.

PROJECTS

Parkinson's Detection | *Python, Machine Learning, OpenCV* [GitHub](#)

- Developed a non-invasive, cost-effective ML system for early detection of Parkinson's Disease using hand-drawn spirals and waves.
- Performed image preprocessing and extracted discriminative features using HOG.
- Applied Random Forest Classifier, NumPy, OpenCV, and image processing techniques to create a scalable clinical support tool

AuraMind – AI Mental Wellness Chatbot | *Streamlit, Python, Gemini API* [GitHub](#)

- Built an AI-powered mental wellness chatbot using Google Gemini for context-aware conversations.
- Integrated DistilBERT sentiment analysis to classify emotions, generate real-time mood scores, and provide personalized responses.
- Implemented mood tracking, session summaries, crisis-support resources, and a responsive dark-themed UI using custom CSS.
- Developed a modular application using Streamlit, Hugging Face Transformers, and secure `.env` configuration.

Student Database Management System | *C, File Handling, Linked Lists, Hash Tables*

- Developed a console-based student database system using core data structures for efficient data storage and retrieval.
- Implemented file handling for persistent data management and structured record operations.
- Utilized linked lists, trees, and hash tables to optimize search, insert, and update performance.
- Enhanced the console interface using `wprintf` and wide-character libraries for improved usability.

TECHNICAL SKILLS

- **Languages:** C, Java, Python, CSS, JavaScript
- **Frameworks/Libraries:** React, Tailwind CSS, Node.js
- **CS Concepts:** Data Structures, Algorithms, OOPs, Operating System, Computer Networks, DBMS
- **Databases:** MySQL
- **Tools:** Eclipse IDE, Visual Studio Code, Git & GitHub, Zabbix, HPSM

CERTIFICATIONS

- Hack-O-Holic 3.0 – Participated and submitted a project presentation at the Hackathon organized by the Co-Dev Club.
- SWAYAM – Completed comprehensive Research Methodology course on research design, awareness, and methodology.
- Python(Guvi, Google)
